

CHENG JING SIANG

Mechatronic Engineering

DETAILS

 2306cjs@gmail.com

 012-548-8250

SKILLS

- Solidworks
- 3D Printing
- MATLAB
- Python
- Artificial Intelligence
- C Programming
- STM32
- Raspberry Pi

LANGUAGES

- Mandarin
- English

PROJECTS

1. Automated Elephant Detection & Early Warning System (Group Project)

Developed an AI-based elephant detection device using Raspberry Pi with image/audio classification and API alert notification.

2. Edge AI low-power water leak detection (FYP)

Developed an STM32U5-based Edge AI leak detection system using acoustic-vibration sensor fusion with LoRa communication.

SUMMARY

Master's degree with Honours in Mechatronic Engineering and graduate with a strong foundation in automation, mechanical design, programming, and AI-based systems. Experienced in developing AI classification projects using machine learning, with hands-on expertise in SolidWorks, 3D printing, Python, C, and MATLAB. Strong problem-solving and teamwork skills, with an interest in automation, software development, and practical engineering solutions.

EXPERIENCE

Production Intern

META Research Sdn. Bhd., Selangor

- Supported production assembly, component inspection, and troubleshooting.
- Designed and fabricated 3D-printed fixtures and workstations using SolidWorks to improve production efficiency.

Technical Intern

Superdough Sdn. Bhd., Kuala Lumpur

- Designed and developed IoT-based electronic props with integrated sensors.
- Troubleshoot and maintained electronic and sensor systems to ensure reliable operation.

EDUCATION

Sep 2022 — Jul 2026

Master's degree with Honours in Mechatronic Engineering

First-Class Honours

University of Nottingham Malaysia, Selangor

Sep 2021 — Sep 2022

Foundation in Engineering

University of Nottingham Malaysia, Selangor

Aug 2016 — Aug 2021

IGCSE

Austin Heights International School
